What's your favorite food and what foods would you like to try?  
 I love Indian food, especially curries and naan. I also love trying new cuisines.

What are you most proud of and why? Moving to a new country, leaving my comfort zone. The experience helped me grow in many ways, from learning to navigate a new culture and language to building a new social network.

Who would be your perfect fantasy dinner party guests and why? Neil deGrasse Tyson, Brian Cox – They have ability to explain complex scientific concepts in an engaging way.

Where and when was your most memorable vacation ever? Why was it so special? One-month solo backpacking trip to Bali. I spent the entire month traveling across the country with only a scooter and a backpack.

What is one thing that most people don't understand about your job which you'd like them to know? Analyzing data becomes fascinating when you start to see patterns and make predictions.

What was a single piece of wisdom or famous quote that has influenced your life in a profound way? "Train your mind to see something good in everything." Author unknown

When you were at primary school, what did you want to be when you grew up? Why didn't you? I wanted to be an astrophysicist. I even studied astrophysics during my bachelor's, but unfortunately, there weren't enough opportunities for further studies.
